Letter of Recommendation for Matej Grozdanić

To Whom It May Concern,

I am pleased to provide this letter of recommendation for Matej Grozdanić. I am writing this recommendation as the CTO of Protostar Labs d.o.o., where Matej has been working as an external contractor since December 2022.

Since his arrival, Matej has been instrumental in developing the user permissions mechanism within the FastAPI framework, which he accomplished independently. He has also successfully implemented automated email messaging and contributed to the development of a script for data automation. Throughout his tenure, Matej has showcased exceptional expertise and knowledge in Python programming language and enhancing code, significantly bolstering the security of our web application.

Matej has been an outstanding external contractor, displaying remarkable diligence and a genuine enthusiasm for sharing knowledge and assisting fellow team members. He consistently overcomes challenges with tenacity and skill. In addition to being a dedicated and dependable contractor, Matej brings a positive spirit to the team, fostering a harmonious atmosphere among other members. His cheerful and optimistic demeanor consistently energizes the workplace. Matej is a valuable asset, readily adapting to new conditions and situations.

Best regards,

Aldin Ćebo
